**Science Ventures Denmark A/S** is university owned venture fund (University of Southern Denmark, [www.sdu.dk](http://www.sdu.dk)). Science Ventures invest in commercialization projects primarily based on research results and patents from universities or government laboratories. Suitable research results are typically further developed in spin-off companies or directly with universities in order to be licensed to industrial partners on a global scale.

**Energy Invest Fyn A/S** is venture capital company investing in primarily early stage companies and technologies within the energy- and telecommunication sectors.
